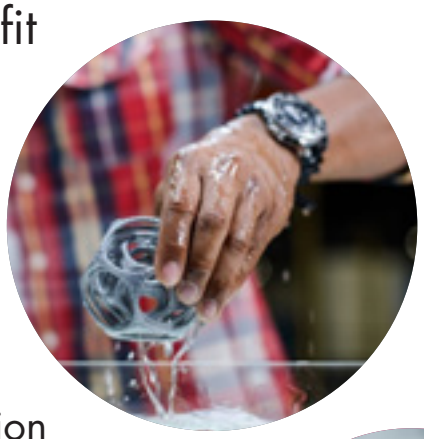
Ultimaker

3D Printing in Practice

Friday 11 Nov

Join ANFF-Q and 3D STEM for a discussion on 3D printing in practice and uncovering the possibilities of how 3D printing can benefit your business or research.



What will you create ... ?

The seminar will be followed by a Q&A session and workshop on our fully equipped Ultimaker 3 demo system.

The new Ultimaker 3 features reliable dual extrusion with water soluble support, a built-in material recognition system, active leveling, and material-matching swappable print cores.

Seminar

10:00 am, Friday 11 November
Level 4, AIBN Building (#75)

Workshop

11:00 am, Friday 11 November
Level 2, AIBN Building (#75)
The University of Queensland

Workshop spaces are limited, so register today!
