ANFF-Q Course

Nano- and micro-fabrication techniques

Date: Tuesday, 27 June

Venue: Room 228, Molecular Biosciences Building #76, UQ

This full-day course will assist post-graduate, post-doctoral and early career researchers understand the basic principles of fabrication of semiconductor, optic and photonics devices, and the range of facilities and expertise they have at their disposal through the Australian National Fabrication Facility.

Program

9:00 am	Introduction
9:30 am	Design and mask making
10:15 am	Thin film technology
11:00 am	Morning tea and Tours 1 & 2
12:00 pm	Photolithography
1:00 pm	Lunch break
1:45 pm	Etching
2:30 pm	Tour 3
3:00 pm	Soft lithography and microfluidics
3:45 pm	Afternoon break
4:15 pm	Packaging and integration technology

Places are limited:
